Attn ; **Public Safety warning : Dean Gubler DO - Chair of OMB / Emanuel Hospital**

We are running adds in local newspapers to locate more patients that have been harmed by Dean Gubler DO -. Gubler is protected by the Oregon Medical Board , but not against malpractice claims .

I have at least 3 so far, presented ( w/o identifiers) in the ' what not to do rounds' at the university and at peri -operative meetings . Gubler 's poor judgment and lack of clinical skills are a consistent topic at Emanuel and throughout Portland -- actually legendary . The staff and residents at Emanuel are well aware of Gubler's gross malpractice and his vindictive nature.

1) A patient that Gubler operated on for appendicitis - had a seminoma in the retroperitoneum -- in spite of a pathology report that was sent to him a week before the elective surgery -- Gubler ( violated the standard of care ) , resected the mass without any neoadjuvent therapy --disseminating the tumor throughout the abdomen.

2) Gubler placed FIVE chest tubes in a patient for a hemothorax ( to avoid going to the OR - for a VATs or thoracotomy ) -- ridiculous - again violating standard of care.

3) Gubler operated for *Eleven* Hours on a bowel case , because he had caused so many enterotomies that he kept trying to repair -- the woman died the following day from multi system organ failure -- gross malpractice

This is the tip of the iceberg with a Public Health Menace.: Gubler has covered for Dr Seth Izenberg to make himself look better . The OMB can only cover for Gubler for so long .

**Ask Bill Long MD** : now retired - he could not find anyone to take over the leadership position in the trauma group because of Gubler's terrible practice habits and Gubler's vindictive, insecure attitude toward physicians with MD ( medical degrees ).
