

Governor Tina Kotek  
900 Court Street  
Suite 254  
Salem, OR 97301-4047

Governor Kotek,

I felt it extremely important that you be included in any sharing of information about COVID-19, so as our new Governor you are able to make intelligent, science-based decisions instead of the false fear mongering and misinformation we have seen in Oregon since 2020.

There have been extreme concerns emerging around the world regarding the COVID mRNA genetic shots. Internationally esteemed and renowned physicians and researchers are asking for the immediate cessation of these shots, and more are stepping forward daily as they see the carnage that has been wreaked upon patients, their families, friends and themselves. Morbidity and mortality numbers are at unprecedented levels worldwide. Healthy teens and young adults just “Die Suddenly”, have strokes, and cardiac events, all transpiring since the introduction of the COVID mRNA genetic shots.

This mailing includes a letter I sent to James Schroeder, Dean E. Sidelinger, MD and Rachael Banks, MPA of the Oregon Health Authority, which is a response to a letter Dr. Sidelinger and Rachael Banks sent to Ms. MacKensy Pulliam dated December 9, 2022 regarding OAR 333-019-1030 – Vaccination Requirements for Teachers and School Staff. I’m was stunned and alarmed by their letter. **Read my response.**

I have also included Indexes for eleven tranches of articles and studies that were initially sent to the Oregon Department of Education and the Sweet Home School District, but as of Tranche 8 additional Oregon bureaucrats are also included. At the very least look through the Index titles which will give you a very good idea of current COVID information.

I would like to get the tranches of articles and research papers to you, but it would have to be via email. If you would email that to me it would be appreciated.

Respectfully,

Eric Dover, MD, CTTH
