

Happy Holidays to All!

Once again, **please ensure that all parties involved with Tina Tressel's case, similar cases, and those in positions of making decisions related to COVID policy, get this information.** Intelligent and informed decisions by the Oregon bureaucracy are extremely important at this time for all Oregonians regarding COVID. It is important for you and your families' financial and physical wellbeing going forward to make precise decisions based upon "THE SCIENCE". Hopefully, the plethora of information I have funneled to all of you helps guide this process.

As you have previously been informed, you are a private trade association, not a board, and therefore **have no governmental immunity**. Once again, I have attached two documents that confirm what I am conveying to you – **1) the Supreme Court NCDB v FTC 2015 decision and 2) a "STATEMENT OF INTEREST ON BEHALF OF THE UNITED STATES OF AMERICA"** from the US DOJ Antitrust Division which was sent to the Florida State Bar (FSB) and the Miami Federal District Court stating in no uncertain terms that the FSB had no "meaningful oversight" and therefore had no immunity as individuals from direct legal action. Your "Boards" have no **meaningful oversight** as described in the SCOTUS decision above. I encourage you to read these two documents very closely so you understand what you are involving yourself in. The SCOTUS has clearly articulated what mechanism of oversight is required to protect individuals on State "boards" from legal proceedings and give them "sovereign immunity".

Internationally recognized medical specialists are emergently calling for discontinuation of any further COVID shots because of the marked rise in morbidity and mortality that has occurred since these experimental genetic shots were introduced to the world. Please see the numerous attachments in Tranche 7 corroborating this.

Two weeks ago, Dr. Masanori Fukushima, Prof. Emeritus at Kyoto University and an Infectious Disease specialist for 25 years, accused the Japanese Ministry of Health of "trying to destroy evidence" regarding COVID shots ill effects. He also stated that "nobody will be 'convinced' by their [the Ministry of Health's] bullshit." He then went on to tell the Health Ministry: "You idiot!.....You should have started from the beginning with a proper scientific light. ...only 10% of the Ministry of Health, Labor and Welfare, who are leading members of the vaccine campaign have been vaccinated. Is this a fucking joke?" Excuse the language, but I feel you need the full force of what this renowned physician had to say.

The documentary “Died Suddenly” was released weeks ago. I highly recommend you watch this video. It will be a wake-up call for most of you.

<https://rumble.com/v1wac7i-world-premier-died-suddenly.html>

Life insurance actuarial data is pouring in from around the world and it is horrific. Deaths are up 40% above the average over the past 100 years plus, especially in the male 18-45 year old age group. This does not include morbidity which is resulting in marked increases in medical insurance company losses and resulting increases in premium costs. This entire situation is causing a panic in the life and health insurance industry.

Blood Banks are currently being established internationally for the “unvaccinated”. <https://safeblood.ch/en/>. There have been two recent infant deaths which were the result of brain “blood clots” after a blood transfusion. In both instances the parents requested transfusion with blood from an “unvaccinated” individual, but the hospitals refused to honor their request even when individuals stepped up to donate. One of the deaths occurred in a child with only minor anemia who didn’t even need the transfusion.

I have attached a number of articles that demonstrate that masks don’t work to prevent spread of viruses because the masks can’t filter anything that small. Also, masks are extremely dirty, especially after wearing them for an extended period of time. Individuals wearing the masks breathe in deadly organisms as a result. In addition, people’s hands become contaminated, and re-contaminated, because they touch their masks all day. In Tranche 6 you were sent studies showing that typical surgical masks are contaminated with the carcinogen titanium dioxide that is inhaled by the unwary individuals.

Lawsuits and investigations continue and will only accelerate. I would hate to see any of you drawn into one of these, especially being you would most likely be held personally responsible for any misjudgments your group think implements. You are at grave risk for extremely costly lawsuits.

I can only assume most of you are in denial. You seem to find it extremely difficult, basically impossible, to admit that you were involved in serious mistakes that have resulted in marked morbidity and mortality of Oregonians. You were fed bogus information by the OHA (Oregon Health Authority), Oregon politicians and the NIH (National Institutes of Health), in particular Dr. Fauci. Their bogus information does not absolve you of past decisions and responsibilities, because the information to make rational decisions regarding COVID, masking, and

COVID shots has been available to you for three years now, but instead you chose, and still choose, not to do your due diligence and refuse to entertain any opinion or scientific information that doesn't fit your narrative. At the very least, the information that was available at the start of the COVID scare should have given you pause – it did for critical thinkers. Going forward, hopefully you will right the wrongs of your past decisions.

Are any of you familiar with the “**Precautionary Principle**”?

From Wikipedia –

“The precautionary principle (or precautionary approach) is a broad epistemological, philosophical and legal approach to innovations with potential for causing harm when extensive scientific knowledge on the matter is lacking. It emphasizes caution, pausing and review before leaping into new innovations that may prove disastrous.”

Once again, I make myself available to you for questions or requests for further information. Sadly, to date, no one has contacted me. It compels me to consider that you truly don't care about Oregonians or the truth,

I have additional documents related to the NCDB v FTC decision that have been written by legal minds that are available to you. All you have to do is ask.

I will be providing the OHA and newly elected Governor Tina Kotek with the same information you have received over the past six months. I don't want anyone being able to wiggle their way out of this situation by saying they had no idea of what was going on. I'd be very careful about your future decisions.

Respectfully,

Eric Dover, MD

eadovermd@gmail.com

PS – in the next tranche of COVID information will be at least one article regarding U.S. VAERS (**Vaccine Adverse Event Reporting System**) data which has demonstrated at least a 4,070% increase in miscarriages and stillbirths since the COVID shots were rolled out.
