Regarding: In the Matter of Tina Tressel

As you know, Mrs. Tressel is an employee of the Sweet Home School District and was working full time as the Special Education instructor until recently. She was put on leave as a result of not taking the Covid shot nor submitting to routine Covid tests. She also refused to wear a mask and shield while in class because she experienced claustrophobia and PTSD while doing so. She was asked to sign paperwork requesting a covid shot exemption, but refused.

Mrs. Tressel has 25 years of dutiful and honorable work associated with the Sweet Home School District. She has had no prior disciplines nor previous problems associated with her job. After 25 years with the district it can be assumed that her work and ethics have been exceptional and exemplary.

Mrs. Tressel cannot be legally forced to sign any documents for an exemption to the covid shot. Her reason(s) for not wanting the covid shot are no one's business other than her own. She has every constitutional and lawful right to refuse the covid shot.

As the last 1½ years have borne out since the covid shots were first administered, Mrs. Tressel made the correct decision not to introduce this experimental shot into her body. First, it doesn't work and actually seems to be interfering with the recipients' immune system. A recent study from Denmark has shown it increases your risk of contracting the covid variant/mutation "Omicron" and "Delta".

(Attachments 1,2) Those not taking the covid shot had only a 3% incidence of Omicron infection, while those that did take the covid shot had an increasing incidence of Omicron infection with the initial covid shot and each subsequent one. In the United States, those states with the greatest percentage of their population "vaccinated" have had the greatest incidence of covid infection, especially the Delta and Omicron variants/mutations. **(Attachment 3)**

Second, the covid shot has been directly linked to significant and unacceptable morbidity and mortality in its recipients. Myocardial infarctions, myocarditis, thrombi, autoimmune disorders, cancer, neurological disorders, miscarriages, abnormal menstrual cycles, and many other medical problems have resulted from these experimental shots; and this is only the initial acute phase of the covid shot experiment. Chronic problems associated with the covid shots have yet to be determined. **Your chance of death from the different covid shots is 169 times greater than an influenza shot.** Look closely at the morbidity and mortality of the covid shots since December 2020 versus all other vaccines since 1990 - **deaths are over five times greater in 1½ years with the covid shots than 32 years of all other vaccines combined.** This information comes directly from the VAERS data on the CDC website. <https://vaersanalysis.info/2022/04/29/vaers-summary-for-covid-19-vaccines-through-4-22-2022/>. VAERS has always been assumed to contain only 10% of the actual morbidity and mortality associated with vaccines; the same is felt to be true with the **EXPERIMENTAL covid shot**. I emphasize experimental because as the first mRNA shot given to humans it was untested

except in a handful of animal studies, the results of which were disastrous.

Medical data has demonstrated that covid shots do not stop the spread of covid. **(Attachment 4)** Additionally, the CDC's data shows masks do not stop the spread of covid. **(Attachment 5)**

The inventor of the mRNA shot, Dr. Malone, has stated repeatedly that this shot should not have been given to humans and that it will create "super spreaders".

He has also stated, **"The idea that if you have a workplace where everybody's vaccinated, you're not going to have virus spread is totally false. A total lie."**

Dr. Malone took two covid shots and has had chronic medical issues since.

(Attachment 6)

Recent military data has shown skyrocketing morbidity and mortality associated with the experimental Covid shots. **(Attachment 7,8)** A just released German study from Professor Harald Matthes of Berlin's Charite University Hospital has demonstrated that **"serious side effects" from Covid 19 shots are 40 times higher than previously reported. (Attachment 9,10)**

Army military flight surgeon Lt. Col. Theresa Long stepped forward as a whistleblower declaring her medical concerns for pilots who received the covid shots and that they should not be allowed to fly without a period of medical observation and medical studies, because of the associated risk of a thrombus (clot) and myocarditis/pericarditis (heart inflammation). **(Attachment 11)**

Dr. Peter Chambers, Dr. Samuel Sigoloff and Dr. Theresa Long, all military physicians, "reviewed DMED numbers that are technically medical billing codes for diseases, injuries, and diagnoses in military personnel. According to those codes, they said, a diagnosis for cancer jumped 300% and female infertility jumped 471%. Among other medical issues, miscarriages jumped 300% and even a diagnosis of Bell's palsy jumped 291%." **(Attachment 8)** These are but a handful of examples.

U.S. Army Lieutenant Colonel Paul Douglas Hague submitted his resignation paperwork, citing the military's vaccine mandate and what he called the "Marxist takeover of the military." **(Attachment 12)**

J.H. Furman, an active-duty commander in the U.S. Navy, spoke out against the military's universal COVID-19 vaccine mandate stating "The forced vaccination of all military personnel with the present COVID-19 vaccines may compromise U.S. national security due to the unknown extent of serious vaccine complications. Further study is needed before committing the Total Force to one irreversible experimental group. Initial reports leave more concern for the COVID-19 vaccinations than the virus itself for the (at present) exceptionally healthy military population." **(Attachment 13)**

Lastly, Pfizer's own data was leaked and demonstrated 1,223 deaths worldwide, many within the first 24 hours, and over 100,000 associated illnesses/disorders in just the first 90 days. **(Attachment 14)** It is no wonder Pfizer doesn't want their data released for 75 years.

Tina Tressel has no obligation, nor is she contracted, to be forced to participate as a "guinea pig" in a worldwide experiment that has proved itself to be a disaster that will only get worse. The covid shots can only be described as a **genocide**.

Tina Tressel was not putting her students nor their families at risk for covid illness. It is now well documented that covid is not a problem for our youth. Of youth 0-18 years old who are infected with covid, the mortality rate is 0.003%. Therefore, there is no rational concern of Mrs. Tressel causing harm to these students. And of the 0.003% who did die, most had significant medical issues that put them at significant risk of mortality from any negative medical issue. **(Attachment 15)**

Also, children are extremely unlikely, if at all, to infect adults at home.

(Attachment 16)

I understand that this information is unknown to you all, and so it seems the criminal Oregon Health Authority (OHA) who is supposed to stay on top of this critical scientific information. I don't use the word "criminal" lightly when describing the OHA, it is a fact. If you'd like more information regarding the OHA's and Oregon politicians' and bureaucrats' criminal acts see the video "No Lives Matter (Oregon Government and Their Corporate Friend's Corruption, Collusion and Racketeering)". The video was created last year and is extremely well

documented with insider evidence collaborating all allegations made. It is available at CorruptOregon.weebly.com.

It is extremely concerning how the Sweet Home School District and the Oregon Department of Justice (ODOJ) have so far handled Tina Tressel's case. A hearing had been scheduled for Mrs. Tressel on April 13, 2022, but instead it was deceptively turned into a board meeting. **This is psychologically and economically abusive.** Tina Tressel was in constant contact with the school board up until her scheduled hearing and was given no indication that her hearing would be postponed.

To date, the public has been excluded from Mrs. Tressel's hearing process. The Sweet Home School District seems to have employed an incompetent lawyer, Ms. Nancy Hungerford. Assistant Attorney General (AAG) Yael Livny stated she was unaware of what Mrs. Tressel's case entailed. Mrs. Tressel's hearing is now supposedly to be rescheduled. Hearings typically involve an Administrative Law Judge (ALJ), but one was not present April 13th. Instead, word is that you have already "cherry picked" a panel of your cronies to make a decision regarding Tina Tressel's case. Again, this is **economic and psychological abuse.**

It is peculiar that two AAGs are currently involved in Mrs. Tressel's case. Oregon AAGs are well known for their corruption. They misuse their positions of power and the public's trust via deceit and rankism to destroy Oregonian's lives and families. The Oregon DOJ, led by Ellen Rosenblum, is known for its corruption. AG Ellen Rosenblum's corruption is prominently featured in the above referenced documentary video. AG Rosenblum has been thoroughly informed of the widespread Oregon corruption and given detailed documentation to substantiate it. The problem is, Rosenblum is deeply and intimately involved with the rampant crime and abuse perpetrated upon Oregonians.

Tina Tressel's case seems predetermined to be heading to a sham hearing, as that is Oregon government's "modus operandi". The three individuals that have been "appointed" to rule on a decision in her case are severely biased in favor of the

school district/state. This is unacceptable. Remember, this case is being watched quite closely.

Respectfully,

Eric Dover, M.D. *Eric Dover, M.D.*
