

Tranche 31 Highlights

Every study, document, and video in this Index should be closely and thoroughly reviewed.

Ivermectin is very effective – see the 222 studies that document this. Hydroxychloroquine has also been found to be effective. Oops! You all were wrong in your castigation of these two medications. I'm not holding my breath waiting for you all to apologize to the public and take responsibility for your lack of critical thinking. **Was money involved in your COVID management decision making?**

Whether you all want to admit to yourselves or not, you have imposed an experimental genetic injection upon the population as bureaucrats, and you have volunteered yourselves and your family as guinea pigs, in a depopulation experiment/program.

Now let that sink in.

I thank God daily for giving me the critical thinking skills to not trust thieving bureaucracies and bureaucrats; and to not take any COVID shot concocted by criminals called Big Pharma. **'Good luck' to those of you who took the shots.** You are going to need it.
