

## **Tranche 33 Highlights**

Pfizer documents reveal that COVID-19 shots did not contain mRNA, but **modRNA (modified RNA)**. Instead of the four nucleic acids that make up RNA, one of the four was modified by man. Ergo, a foreign, unnatural nucleotide was put into your body if you received the COVID shot.

The COVID shots **alter the immune system's cytokine response**.

**92% of COVID deaths in 2022 were in the triple plus vaccinated. And half of the people who received the COVID shot will continue to produce spike proteins.**

In the UK, hospital staff were ordered to **'euthanize' patients according to a physician whistleblower!**

There has been an **alarming rise in US and UK disability**.

Don't worry. It's nothing, right? Ignorance is bliss I'm told.
